OBJECTIVE

Leverage communications and leadership experience developed from five years of teaching and mentoring to learn and innovate in software engineering.

EXPERIENCE

April 2015 – October 2020
Regional Education Mentor • Axiom Learning LLC

- Configured network and devices as the de-facto IT administrator.
- Created report generator templates and processed bulk student diagnostic and metrics data to aid data-driven education goals.
- Integrated cutting-edge education and child psychology research into curriculum and training.
- Developed curricula for test prep, writing fluency, cognitive skill development, young men's leadership, and more.

COMMUNICATION

- Led weekly meetings with full- and part-time teaching staff to discuss students' learning outcomes and guide lesson planning.
- Collaborated with a global education team to align education quality across centers and coordinate curriculum projects.
- Established first marketing contact with prospective clients' families and led progress meetings with parents.

LEADERSHIP

- Developed instructor training resources and led instructor trainings in person and through online conferences.
- Discussed company performance with global managerial staff to set yearly education, outreach, and financial goals.
